FRP GRATING

SPECIFICATIONS

MATERIAL:	FRP MOLDED GRATING, POLYESTER
FINISH:	GRIT-SURFACE
SIZE:	4' WIDE X 8' LONG X 1" THICK, 1.5" MESH-PATTERN
FIRE RETARDANT	
COLOR	DARK GREY
GRATING M-CLIP	316 STAINLESS STEEL

Polyester Resin with Fire Retardant Additives as per ASTM E-84 25

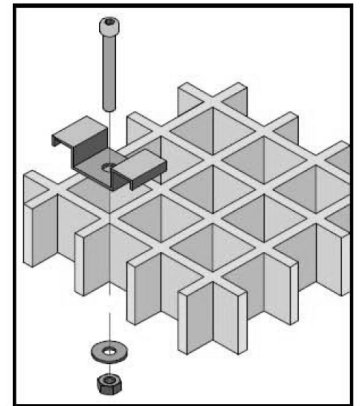

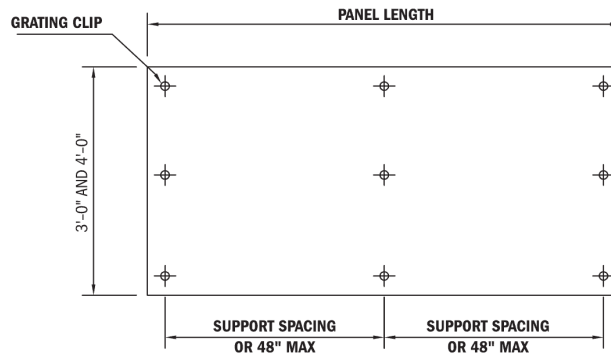

FRP GRATING BENEFITS

Molded Fiberglass Gratings are used for their high strength, corrosion resistance, light weight, long life and safety. All FRP grating is made to meet the highest international standards.

Molded fiberglass grating also has many advantages over steel grating for performance and cost effectiveness. With a much higher strength-to-weight ratio, molded fiberglass grating is easy to handle, making for quick installation.

DETAILS

Sizes: 4'x8' sheets at 1 1/2" thick
